## WORK EXPERIENCE

---

### Hydropool

*Software developer*

**Oct.2024 – Present**

*Ikorodu, Lagos*

- Designed and implemented responsive and dynamic front-end interfaces for web applications using **Next.js** and **Tailwind CSS**, ensuring seamless user experiences across devices.
- Developed and maintained scalable and performant back-end APIs using **Fastify**, following RESTful and GraphQL standards for robust client-server communication.
- Built and optimized mobile applications with **React Native**, providing cross-platform functionality for Android and iOS users.
- Leveraged **Prisma ORM** for efficient database schema design, migrations, and interactions, ensuring data integrity and optimized query performance.
- Collaborated with UI/UX designers to translate mockups into high-quality, reusable React components, adhering to design system principles and accessibility standards.
- Integrated third-party APIs and services, implementing secure authentication and authorization workflows using tools like OAuth and JWT.
- Enhanced application performance and scalability by implementing caching strategies, server-side rendering (SSR), and static site generation (SSG) using **Next.js**.

### Brookstech

*Full-stack developer*

**Sept.2023 – Present**

*Ikeja, Lagos*

- Developed user interfaces with modern JavaScript frameworks React.js and Next.js.
- Created accessible, responsive, and functional user interface to allow users on any device to have the best user experience
- Addressed regular production bugs and improvements in existing JavaScript service.
- Developed object-oriented code in Node.js
- Designed a robust database management system using MongoDB, improving data handling efficiency.
- Implemented key aspects of web security.
- Collaborated with cross-functional teams to standardize the system development process, improving project delivery rate.
- Increased software release speed by pioneering the implementation of Agile programming methodology.

## Freelancing

*Full-stack developer*

**Jan.2020 – Present**

*Ikeja, Lagos*

- **Novatrend:** Designed and developed a fashion E-commerce website using Next.js, and Epress.
- **Optimal solutions:** Developed a Figma design for optimal solutions. A company that offers pest control and cleaning services.
- **Seakam Global Resources Limited:** Designed and developed the official website for one of the leading herbal drinks manufacturing companies in Nigeria.

## Naijaodin

*Founder & full-stack developer*

**Jun.2022 – Sept.2023**

*Ikorodu, Lagos*

- Naijaodin is a movie streaming platform.
- As Founder, I oversee our core strategies, quality of articles, advertisement on website, marketing, and fundraising.
- Designed backend using apollo server, to interact with the database to present articles and movies as requested by the frontend. It also sorts trending movies based on the user downloads.
- Using Next JS, I make sure the users have the best experience on the front end.

## EDUCATION

---

### Osun state university

*BSc/Ed Education and political science*

**Sept 2019**

*Osogbo, Osun*
